ER 2020

November 3–6, 2020 in Vienna, Austria

39th International Conference on Conceptual Modeling

TU WIEN

IMPORTANT DATES

Workshop proposals:	Feb 21, 2020
Notification:	Mar 5, 2020

Workshop Proceedings

Proceedings of all ER workshops will be published as a single volume of Springer LNCS. All workshop papers are limited to no more than 10 pages in LNCS format. It is expected that the organizers of ER workshops conform to the rules imposed by the ER steering committee. In particular, the acceptance rate for all workshops will not exceed 40% and organizers are not allowed to submit papers to their own workshop.

Workshop Chairs

- Georg Grossmann
  University of South Australia
- Sudha Ram
  University of Arizona, USA

CALL FOR WORKSHOPS

Continuing a long tradition, ER 2020 will host a number of workshops to be held in conjunction with the main ER 2020 conference. The workshops will serve as an intensive collaborative forum for exchanging innovative ideas about conceptual modeling, and for discovering new frontiers for its use. We specifically invite proposals for interactive workshops on new, emerging, or established topics in conceptual modeling, or its application in specific domains. We encourage workshop organizers to include activities that provide their participants with a true workshop experience. Topics of interest include foundations of conceptual models, theories of concepts, ontology-driven conceptual modeling and analysis, methods and tools for developing, communicating, consolidating, and evolving conceptual models, and techniques for transforming conceptual models into effective implementations.

Submission Guidelines

Please select the *Workshop* track when submitting.

Submission Link: https://easychair.org/conferences/?conf=er2020

Proposal Evaluation Criteria

The number of acceptable workshop proposals is limited by the time available and the facilities of the conference venue. Workshop proposals will be evaluated according to the:

- Scientific quality of the proposal
- Significance to conceptual modeling
- Likely numbers of high-quality submissions
- Quality of workshop experience for participants
- Overlap with other workshops
